

Persona 1 - Ben Adams

Name: Ben Adams

Age: 50

Occupation: Carpenter

Location: Southern Ontario

Education Level: High school

Tech Background: Not very tech-savvy. Only owns a smartphone

Goal: Be able to predict when the salmon run has started, so he can go salmon fishing in the Ontario salmon rivers.

Ben Adams is a 50-year-old Canadian man who lives in southern Ontario as a carpenter. He lives in a home with his wife and 13-year-old son. One of Ben's hobbies is fishing, and he loves fishing for salmon in the Lake Ontario salmon rivers during the salmon runs. This is a time that usually begins in August and lasts until mid-November. During the salmon run season, Ben travels to several Lake Ontario rivers each weekend after rainfall, in hopes of catching salmon. Ben wants a more effective way to know when the salmon are ready, because when the season starts approaching in late summer, he usually just tries his luck in guessing whether the salmon have started, and sometimes makes the trip to one of the Lake Ontario salmon rivers, only to find that there are no salmon. He is aware that salmon only appear when the rivers are at the correct temperature, but he does not have a reliable way to access accurate temperatures for himself. This is frustrating for Ben because he travels a long distance to get to the salmon rivers, and it's a waste of time if there aren't any salmon. Ben doesn't consider himself the most tech-savvy, and doesn't own a personal computer, but he is comfortable operating his smartphone, which he frequently uses for messaging and checking the weather.

Persona 2 - Emily Johnson

Name: Emily Johnson

Age: 23

Occupation: University Student

Education Level: University

Tech Background: tech-savvy. Owns a personal computer and smartphone

Goal: Wants to be able to reliably and consistently know which days the lake temperatures are swimmable, so she can more effectively plan beach outings with her friends

Emily Johnson is a 23-year-old Canadian woman who lives in Toronto and is a University Student. She lives Downtown with her roommates. When the weather is warm, Emily loves going to the beach with friends, where they like to play volleyball and swim when the water is warm enough. Her favorite beach to go to is Woodbine Beach since it is not that far from her apartment. She usually prefers going to the beach from July to September, when the waters are generally the warmest. Although she loves visiting the beach, Emily dislikes how inconsistent the water temperatures of the lake can be, going from swimmable one day and too cold the next. It makes it difficult for her and her friends to plan beach outings. She wishes there were a way to consistently know the temperature of the water each day, without having to risk commuting to the beach first. She considers herself pretty tech savvy, and owns a smartphone and personal computer, which she uses for school. She has tried several apps in the past to get information on water temperatures, but has had bad experiences with inaccurate and unreliable information from them.
